

Thank you for buying **UniPay**!  
Your support is greatly appreciated.

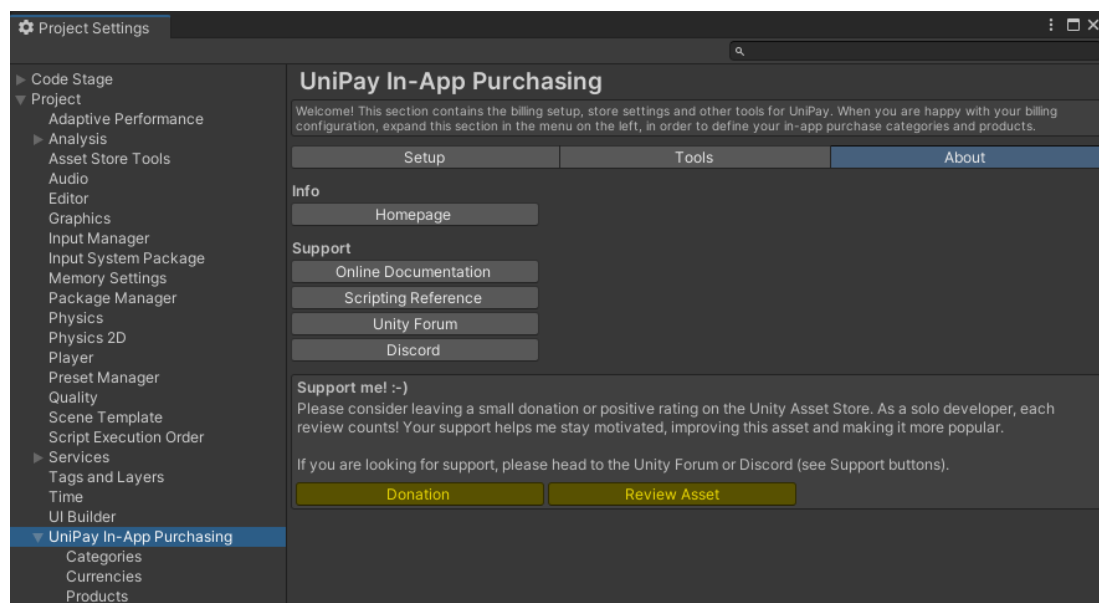

## Install Instructions

<https://flobuk.gitlab.io/assets/docs/sis/install>

## Contact

As full source code is provided and every line is well-documented, please feel free to take a look at the scripts and modify them to fit your needs.

If you have any questions, comments, suggestions or other concerns about our product, do not hesitate to contact me. You will find all important links in the **About** tab, located in the Project Settings under *UniPay In-App Purchasing*.

UniPay is on the Unity Asset Store since 2013, but I will keep maintaining it and adding more features, as long as users - like you! - are using it.

If you would like to support me on the Unity Asset Store, please write a positive review there so other developers can form an opinion. And if you would like to support me outside of the Asset Store, please consider [a donation](#) or using [IAPGUARD](#) (Server-Side Receipt Validation Service).

Again, thanks for your support, and good luck with your apps!
